

EXPLORING PHOTOGRAPHY

REBONWE Primary School pupils from Ivory Park are telling their township stories through photographs.

The pupils learnt about photography during a three-day workshop from August 26 to 28.

The workshop was hosted by the French NGO, An Eye For An Eye.

Founded by Ms Dorothee Adam and Ms Claire Mazard, the project is not only focused on learning photography.

It also enables children to discover other cultures to open

their minds and to promote their environment.

An Eye For An Eye has launched a photographic exchange between Rebonwe Primary School and Calenzana Primary School in France.

About 174 children from France, India, Cambodia, Bolivia, South Africa, China and Greenland will showcase their work at the exhibition in Paris at the 21st United Nations Convention on Climate Change (COP21) in December.

Rebonwe Primary School

teacher, Mr Peter Mpangane who is also a photo exchange coordinator, said the French NGO has donated two cameras and a stand during a visit to their school last year.

"This could ignite a passion in others to follow photography as a future career," he said.

Members from the French NGO, the Eye for an Eye project, Rebonwe school officials together with the pupils, showing off their cameras which will be used in the project.
